General Information

Process Agreements on Participation

The purpose of this committee is to develop detailed technical information as proposals for the full Collaborative to consider so continuity of participation is critical. All meetings are open, and everyone is welcome. However, new or visiting participants are asked to respect the discussion history and recognize that the facilitator or a committee member may request to discuss a question or issue at the break or after the meeting if the committee has already covered this subject matter. The committee may also request that the issue be discussed as part of the full Collaborative meeting. Thank you for your understanding on this issue because building consensus with widespread support is critical to SOFAR success.
