

AGENDA: SOFAR Landscape Vision Committee

Tuesday, June 11, 1:00-3:00

Location: Supervisor's Office, 100 Forni Rd, Placerville, CA

Contact: Gina Bartlett (gina@cbi.org or 415.271.0049)

Note: The group NOT meet on June 27.

AGENDA TOPICS

Review / Revise Agenda

TCSI Assessment: how can SOFAR better understand and potentially integrate the TCSI Assessment into SOFAR work and the CWPP (With Pat Manley)

Science Talk – Seral Conditions: Lake Tahoe West is developing a model and approach, including a set of indicators for a similar landscape based on certain conditions. The SOFAR Collaborative would like to understand **what type of seral conditions are ideal on the landscape?** This would be a science talk for the full collaborative (with Becky Estes)

Developing SOFAR Baseline Conditions: The group has talked a few times about developing baseline conditions to demonstrate the benefit of projects. This would help make project applicants more competitive if they could demonstrate the baseline. How might the TCSI Assessment or Lake Tahoe West work support this? How might SOFAR develop these baseline conditions.

Identify potential **Field Trip Day for Red Fir** with Beverly Buluan, USFS Region 5 Forest Health Protection
